Limescale & Corrosion

How Hard Water effects your home and health?

- ▶ **Pipes** can become clogged with scale that reduces water flow and ultimately requires pipe replacement. Limescale has been known to increase energy bills by up to 25%.
- ▶ **Hair** can turn rough, dry, unmanageable and frizzy, even by washing your hair with soap leads to possibility of hairfall and scalp.
- ▶ **Clothes** washed in hard water often look dingy and feel harsh and scratchy. Continuous laundering in hard water can damage fibers and shorten the life of clothes by up to 40 percent.
- ▶ Unregulated Calcium and Magnesium salts in the water can cause your **skin dry** and itchy, and can cause irritation.
- ▶ **Washing dishes** with hard water may cause spotting and filming on your crockery.
- ▶ **Solar heating / water heaters**, often used for heating water is prone to limescale buildup, which can reduce the efficiency and increase the maintenance.

Rust and Corrosion free Pipes

Presenting...

Dr. Softener
Water Treatment System

Dr. Softener unit is an encapsulation of inner copper which is filled with special formulated Ceramic media and installed with flow modulator at each end and then locked making Dr. Softener instant ready for installation and use.

3 STEP PROCESS

The ecological water treatment against limestone

Gently reduces existing scale build-up

Protects against rust and corrosion
